

# MARGINS PLUS

## VENDOR REQUEST FOR QUOTE

Many of our clients have asked us to try and automate the process of requesting quotes from their vendors. We are happy to announce that our Vendor RFQ System has been added into the standard customer-quote-entry function in the "Margins Plus" Software Package.

This feature is extremely effective for our clients who sell a decent quantity of non-stock or special items. You can now enter the vendors who you need a quote from, for a particular item.

The system will automatically collate all the items that are to be sent to a particular vendor and give you the option to fax the RFQ direct from the system. If you would like additional information, please call your system account manager.

Let **MSEDP** help with your inventory dilemmas. . .

We'll find the solution to keep your business running smoothly.
